Upgrade your License

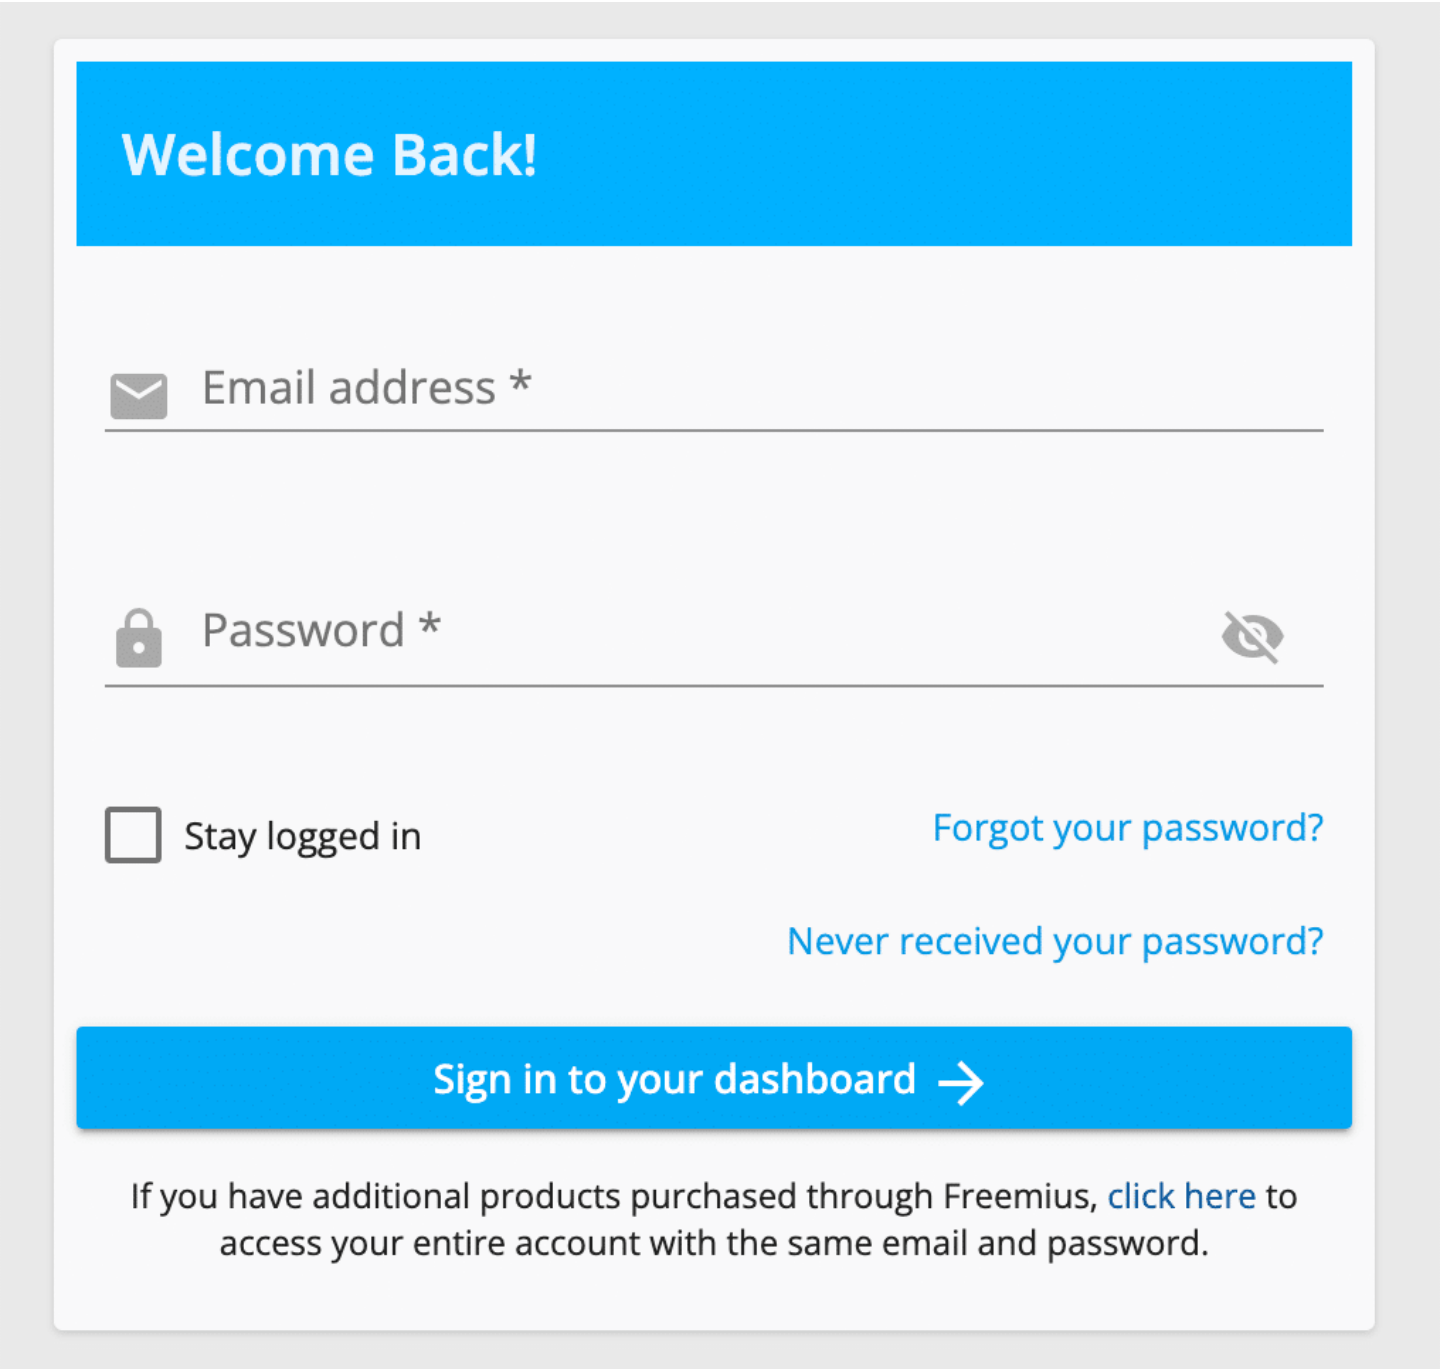
Account & Licenses · https://clickwhale.pro/docs/article/how-to-upgrade-your-license/

Upgrading your license to include more sites or switch from an annual subscription to a lifetime license is easy. The good thing is, no settings and customization made previously will be lost.

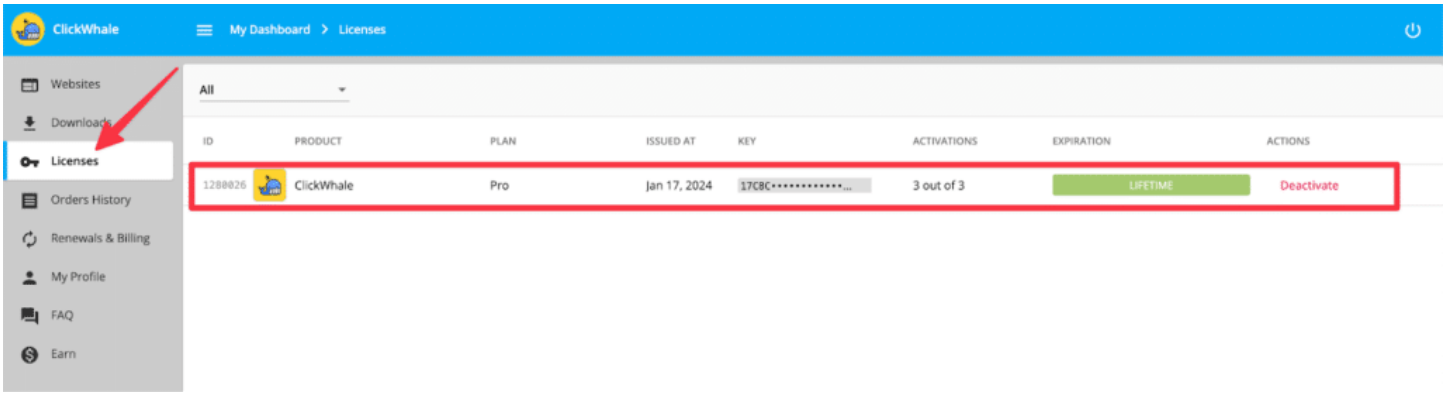
Upgrade options are available in your account area or on the pricing page. Here’s how:

Option 1: Upgrade Through Your Account

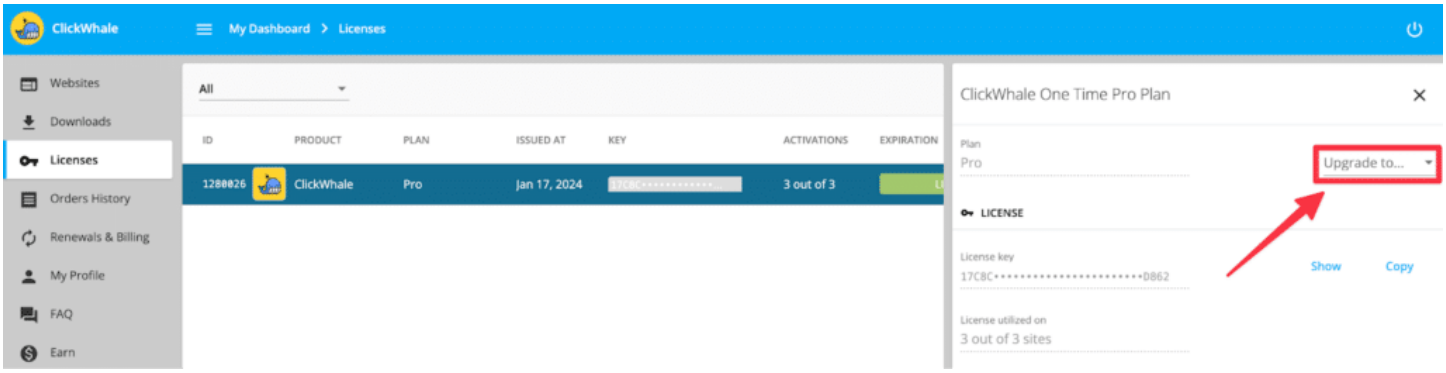
Start by visiting the Account page and clicking the “Click here to Login Now” button. A new page will open in a new tab with the Freemius login form. Log in your email address and password to sign in to your dashboard.



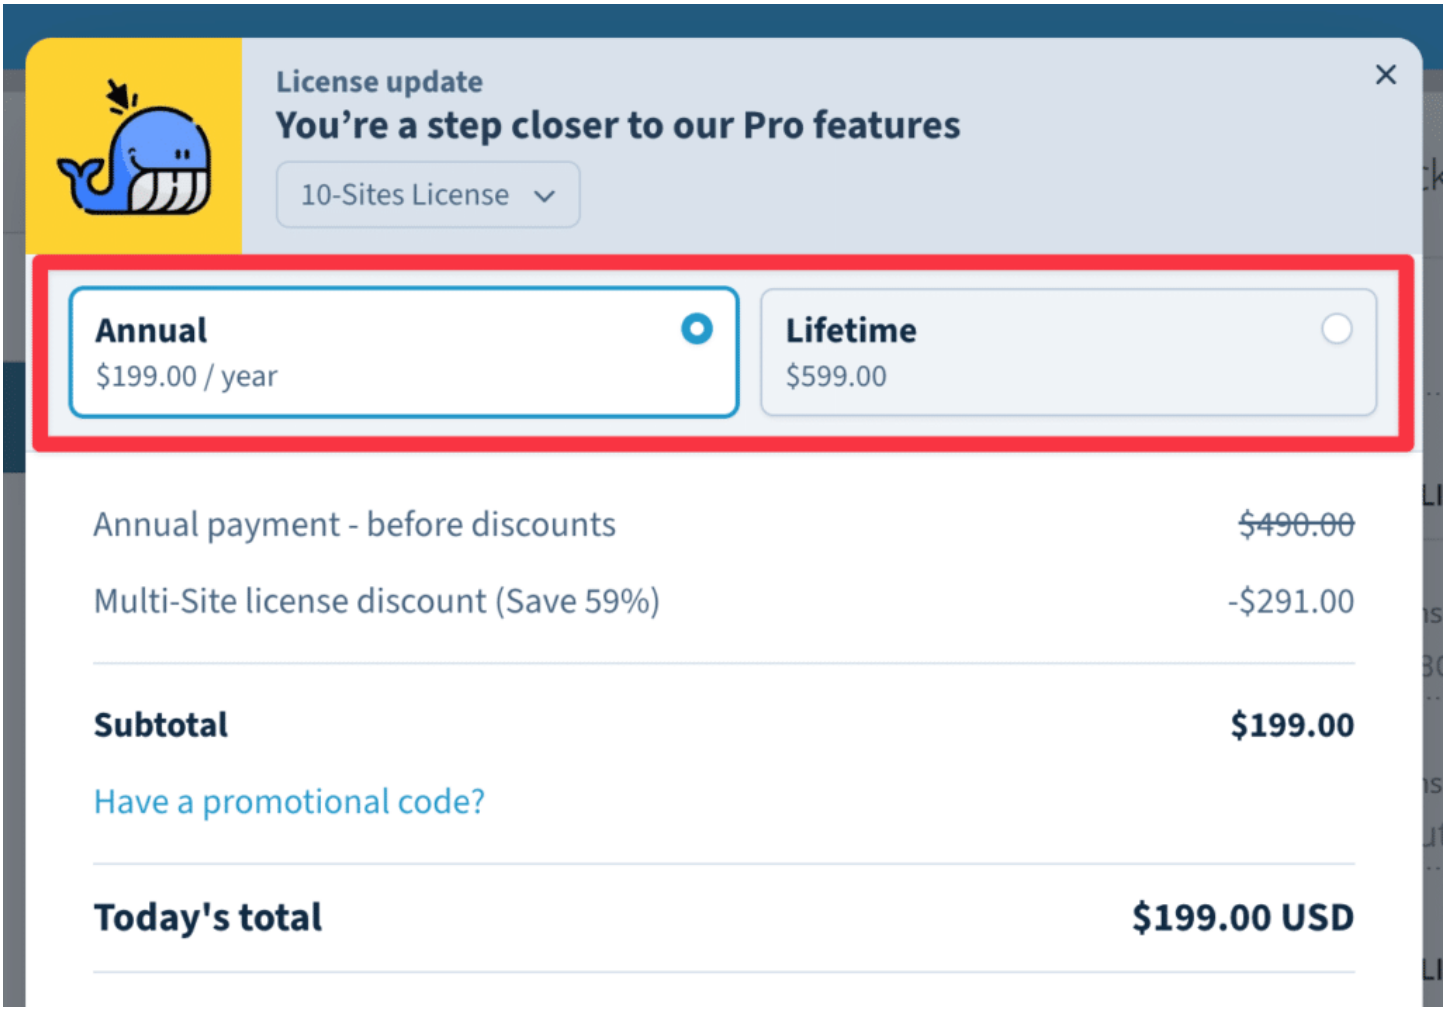
Within your customer account, navigate to **'Licenses'** and select the row corresponding to the license you wish to upgrade.



A form with the information of your current plan will appear on the right side. Click on the **'Upgrade to'** dropdown menu and select either 3 sites or 10 sites, depending on the number of sites you will be using the license for. This will open the checkout modal form.



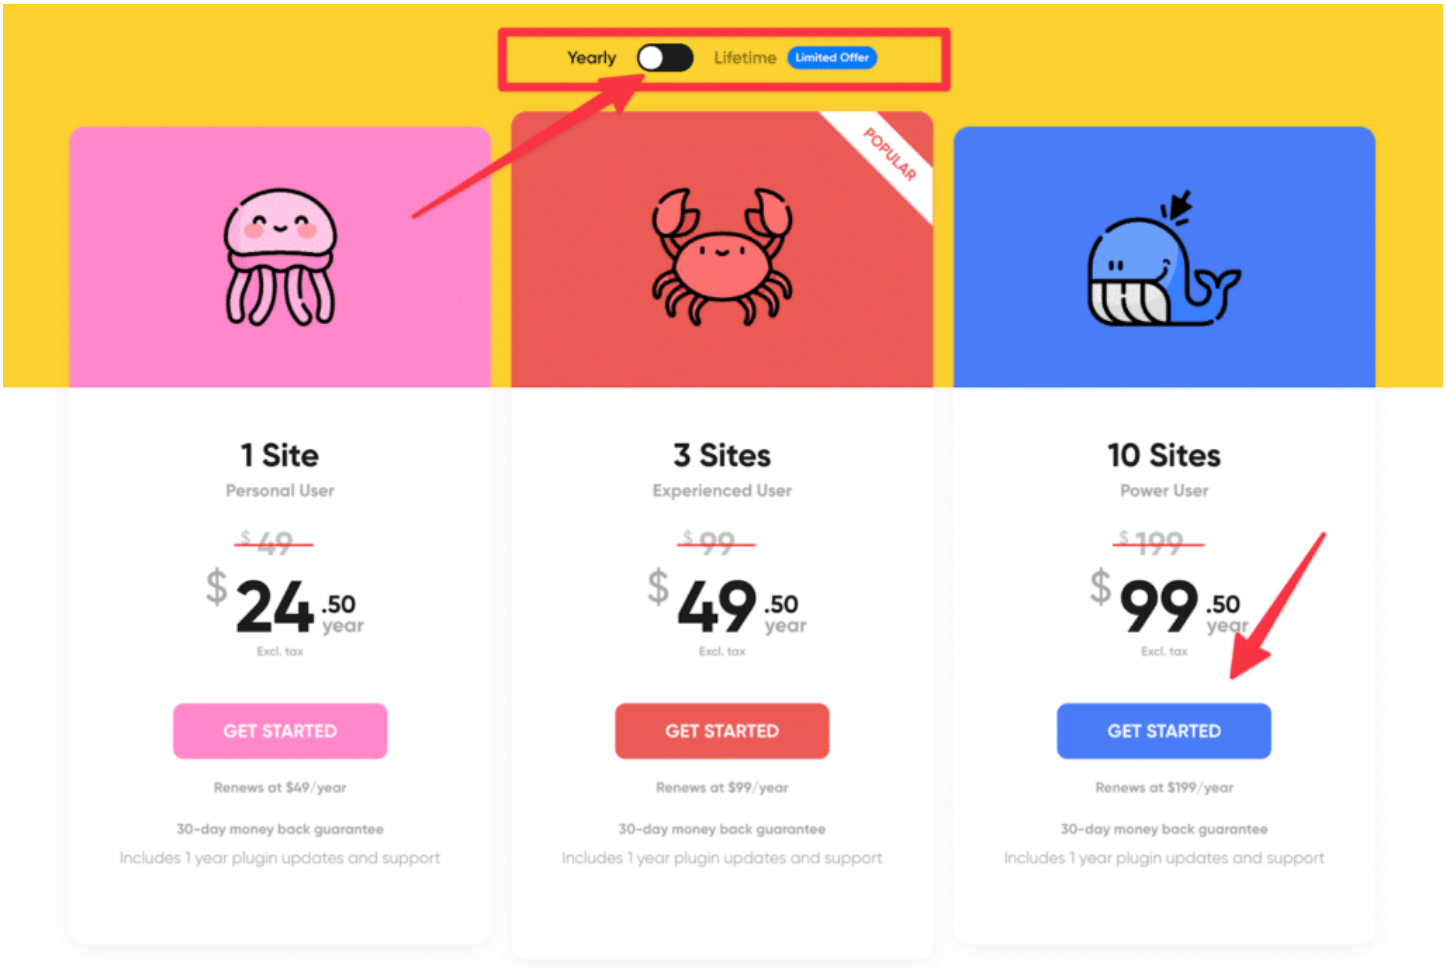
Within the checkout modal, select either an annual or lifetime license, and the appropriate discount will be applied automatically.



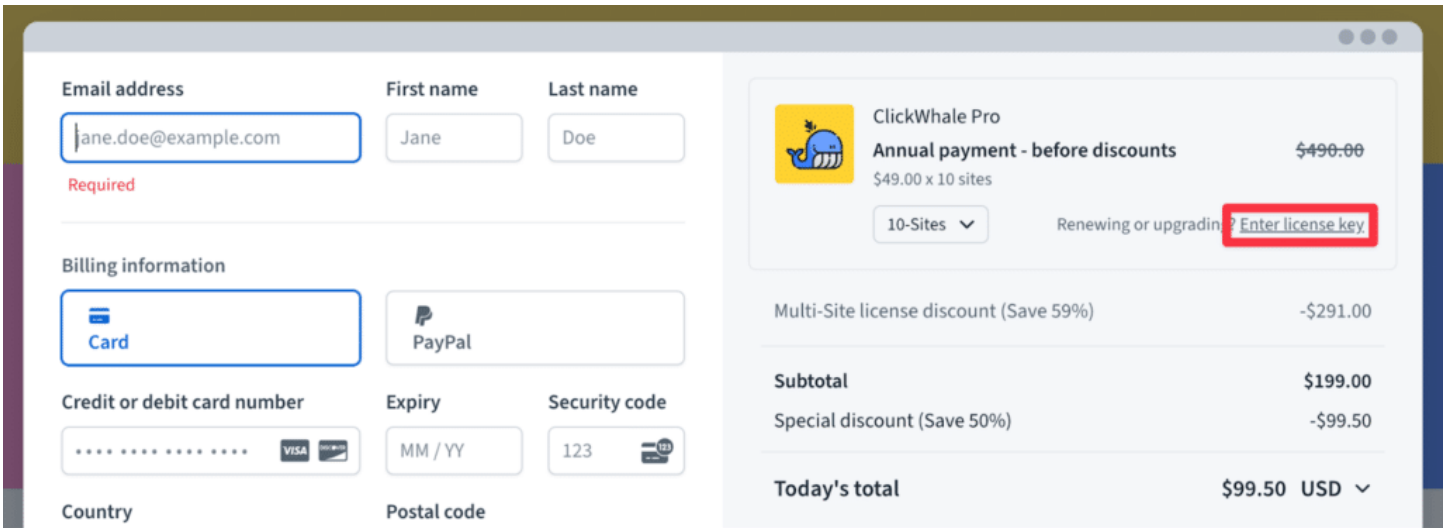
Lastly, enter your billing information, review your order, and complete the checkout process.

Option 2: Upgrade Through Pricing Page

Start by visiting the Pricing page. Toggle between **yearly** and **lifetime** options to choose the type of license you want. Click the '**Get Started**' button under your desired tier to open the checkout modal.



In the checkout modal, click the link labeled '**Enter license key**'.



A text field will appear. Enter your license key and click '**Apply**'. The appropriate discount will be applied automatically.

Finally, enter your billing information, review your order, and complete the checkout process.

FAQs

Can I upgrade my ClickWhale license at any time?

Yes. You can upgrade your ClickWhale license whenever you need access to additional features or a higher plan.

Will my existing ClickWhale data be preserved when I upgrade?

Yes. Upgrading to ClickWhale Pro does not remove your existing links or settings. Once your Pro license is activated, you'll have access to the additional Pro features.

How do I upgrade my ClickWhale license?

Go to **ClickWhale > License** in your WordPress dashboard and select **Upgrade**. You'll be taken to the checkout page to complete the upgrade.

Do I need to reinstall ClickWhale after upgrading?

No. Your existing ClickWhale installation remains the same. Once the upgrade is complete, your new license and features will be available after your license is updated.
